DETAILED ACTION

Response to Amendment

This Office Action is in response to applicant's amendment filed on February 26, 2007. All previous prior art rejections are withdrawn.

Allowable Subject Matter

Claims 1-17, 31-36, and 38-40 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art does not disclose or suggest temporarily impairing functionality of a GI tract, ablating stomach tissue, and measuring stomach acid levels before and after the temporary impairment. Edwards (U.S. Pat. No. 6,405,732 B1) discloses ablating stomach tissue which inherently inhibits the production of stomach acid. However, there is no disclosure of or motivation to temporarily impair functionality and measure stomach acid levels before and after the temporary impairment.

Regarding independent claim 34, the prior art does not disclose or suggest measuring and comparing stomach acid levels before and after ablating stomach tissue, wherein the second acid level is measured one week after ablation. Edwards (U.S. Pat. No. 6,405,732 B1) discloses ablating stomach tissue which inherently inhibits the production of stomach acid. Edwards (U.S. Pat. No. 6,254,598 B1) teaches a pH

monitoring catheter, but there is no motivation or suggestion in Edwards ('598) or the prior art to measure the second acid level one week after ablation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
